AI PLAYBOOK HVAC CONTRACTORS

A high-clarity operating file for turning estimates, service calls, reviews, reminders, and seasonal demand into a cleaner growth workflow.

Field BUILT FOR REAL SERVICE OPERATORS	Fast CUSTOMIZE BEFORE THE NEXT JOB	Local SHARPER TRUST IN YOUR MARKET	Repeat SYSTEMS FOR STEADY DEMAND
--	--	--	--

USE THE SYSTEM

MAKE EVERY LEAD EASIER TO CONVERT.

Start with the asset closest to the next business moment: estimate follow-up, maintenance reminder, review request, service agreement, seasonal campaign, or referral ask.

01

Match the job type

Adjust the language for install, repair, quote, maintenance, emergency call, membership, or repeat service.

02

Localize the trust

Add the city, service area, homeowner concern, business context, and proof points that make the message credible.

03

Move fast

Use the finished asset in the same week: send the follow-up, post the content, request the review, or launch the campaign.

Chapter 1: Why AI Is The HVAC Contractor's

Competitive Edge The HVAC contractors dominating their local markets aren't just better technicians. They respond to estimates faster. They follow up on quotes that go cold. They send maintenance reminders before a unit fails instead of waiting for the emergency call. They stay visible on Google and social media without hiring a marketing agency. AI makes all of that possible — and at a cost that makes sense for a service business. • The Estimate Follow-Up Problem: Many HVAC estimates that do not convert within 48 hours are never followed up on consistently.

03

OPERATOR ASSET

Chapter 1: Why AI Is The HVAC Contractor's

The contractor who follows up clearly and professionally often stays top of mind when the customer is ready to choose. • The Service Agreement Opportunity: HVAC companies with a strong service agreement base often create more predictable customer communication, steadier seasonal touchpoints, and a clearer reason for customers to return. AI writes the offer, the

OPERATOR ASSET

Follow-Up, And The Renewal System.

• The Google Review Machine: For HVAC contractors, Google reviews are one of the most important local trust assets. Customers search 'HVAC near me' or 'AC repair [city]' and hire whoever has the most reviews and the highest rating. AI writes the review request so the ask is easier to send consistently. • What AI Does vs. What You Do: AI handles communication, follow-up, and

05

OPERATOR ASSET

Content. Your Technicians Handle Diagnosis, Installation, And Service. Never

confuse the tools with the craft.

Chapter 2: Your First 3 AI Wins This Week

Start with one this week. Each can be set up quickly and gives the business a more consistent follow-up rhythm. • Win #1 — Estimate Follow-Up Sequence: AI writes a 3-message follow-up sequence for every estimate that doesn't convert in 48 hours: a Day 2 check-in, a

02

OPERATOR ASSET

Offer. Most HVAC Contractors Send Zero Follow-Ups. This Sequence Alone

gives more unsold estimates a clear, professional follow-up path. • Win #2 — Post-Service Review Request: Sent 24 hours after every completed job, AI writes a personal review request that links directly to your Google Business Profile. A stronger review base can make customers more confident when comparing local contractors. • Win #3 — Service Agreement Offer Email: For every customer after a repair call, AI writes a service agreement offer that calculates their expected savings, explains what's covered, and makes signing up feel like the smart financial decision.

03

Chapter 3: Filling Your Schedule — Reactive

AND Proactive The most organized HVAC companies do not wait for the phone to ring. They have a systematic outreach calendar that fills the slow weeks before they become slow. • Seasonal Tune-Up Campaign: Spring AC tune-up and fall heating tune-up campaigns — sent to your entire customer list in February and September — are one of the most reliable ways to stay visible before seasonal demand spikes. AI writes the email, the text, and the social post for each campaign. • The Maintenance Reminder System: For customers on service agreements, AI writes automated reminder messages — filter change reminders, annual tune-up scheduling,

04

Chapter 3: Filling Your Schedule — Reactive

and system age notifications — that keep your existing customers engaged and your schedule full.

Field System

- The Lapsed Customer Win-Back: For customers who haven't called in 2+ years, AI writes a win-back message tied to a seasonal offer or a unit age alert: 'Your system is 10+ years old — here's what to watch for and how we can help.'
- New Homeowner Outreach: New homeowners are among the highest-value HVAC prospects — they don't know the history of the system and they're often anxious about it. AI writes an outreach sequence targeting new homeowners in your service area.

02

OPERATOR ASSET

Chapter 4: Service Agreements — A Strong

Recurring Customer System A service agreement base can change how an HVAC business handles cash flow, scheduling, customer lifetime value, and long-term relationship building.

- The Post-Repair Upsell: A practical moment to introduce a service agreement is after a repair — when the customer has just experienced system failure and is most motivated to prevent it happening again. AI writes the post-repair agreement offer that makes the next step clear without pressure.
- The New Install Agreement Offer: Every new installation should include a service agreement offer.

03

OPERATOR ASSET

Chapter 4: Service Agreements — A Strong

AI writes the post-install follow-up that explains ongoing maintenance, what's covered, and why preventive maintenance can help reduce surprise issues and protect their equipment over time.

- The Annual Renewal Sequence: For existing agreement customers approaching renewal, AI writes a renewal reminder sequence — 60 days out, 30 days out, and expiration day — with increasing urgency and a loyalty discount for long-term customers.
- The Lapsed Agreement Win-Back: For customers whose agreements lapsed, AI writes a win-back offer that acknowledges the gap, explains what they may have missed, and makes renewing easy.

Engine For HVAC contractors, word of mouth and Google reviews are the two most cost-effective customer acquisition channels. AI makes both systematic. • The Post-Job Review Request: Sent 24 hours after every completed service call or installation, this message thanks the customer, links directly to Google, and asks for their honest feedback. Contractors who do this consistently see 5- 10 new Google reviews per week. • The Referral Ask: Happy customers refer. But only when asked. AI writes a

02

OPERATOR ASSET

Referral Request That Goes Out 1-2 Weeks After A Positive Service Call — Warm,

personal, and with a clear incentive if you offer one. • The Realtor and Property Manager Partnership: Real estate agents and property managers are repeat HVAC customers with ongoing needs. AI writes a professional introduction and a quarterly check-in that puts you at the top of their

03

Referral List.

• The Home Builder Relationship: New construction HVAC is consistent, high-volume work. AI writes a contractor introduction that positions your company as the reliable, professional choice for local homebuilders.

04

Chapter 6: Social Content That Builds Local

Authority HVAC contractors who post consistently on Google Business Profile and Facebook get more calls — period. The research shows customers search, read reviews, look at recent posts, and then call. AI makes consistent posting achievable alongside a full service schedule. • The 3-Post Formula: One educational post (system tip, energy savings, seasonal advice), one social proof post (completed job, review highlight, before/after), one seasonal/timely post (weather alert, tune-up reminder, new equipment feature). Mon/Wed/Fri. • High-Converting Content Topics: 'Signs your AC is about to fail,' 'What a tune-

up actually includes,' 'How much a new system actually costs in [city],' 'The most common HVAC mistake homeowners make,' 'Why your energy bill is high in summer.' • Google Business Profile as Your #1 Platform: For HVAC, GBP is more valuable than Instagram or Facebook. Weekly posts, responding to every review, keeping hours and services updated, and uploading job photos consistently drives significant organic call volume. • Before/After Job Photos: The simplest, highest-performing HVAC content. Old dirty system vs. clean new installation. Technician at work. Job complete. AI writes the caption — you take the photo on your phone.

Message 3 (Day 14): final soft close with a small incentive or urgency. Sign as [Your Name], [Company Name], [Phone].
Service Agreement Offer Write a service agreement offer email for an HVAC contractor. The customer [Name] just had a [repair type] completed on [date]. Their system is [age] years old. Our agreement covers: [list 3-4 key benefits]. Annual cost: \$[amount]. Emphasize: what they just paid for repairs, what they could have caught early with a maintenance plan, and the peace of mind value. Keep it under 200 words. Warm, professional. Sign as [Your Name], [Company Name].

02

OPERATOR ASSET

Social / Gbp Content

Write 5 Google Business Profile posts for an HVAC contractor in [City]. Topics: signs your AC needs a tune-up before summer, what's included in a standard HVAC tune-up, how to lower your energy bill this [season], why you should replace your HVAC filter every [timeframe], and one recent job highlight (describe: [job type, neighborhood, outcome]). Each under 150 words, local and conversational. Company: [Name]. The best HVAC companies aren't just the best technicians. They follow up. They stay visible. They make it easy to say yes. AI helps you do all three.
