

HEALTHY SMILES · CONFIDENT CARE

AI Playbook Dentists

A clean, modern dental growth system for improving patient flow, follow-up, treatment communication, reviews, and trust-building content.

01

IMPROVE PATIENT FLOW

02

EDUCATE WITH CLARITY

03

STRENGTHEN REVIEWS

04

BUILD LASTING TRUST

USE THE SYSTEM

Make care easier to understand and act on.

Start with the next dental moment: new-patient inquiry, treatment explanation, hygiene recall, post-visit follow-up, review request, or case acceptance support.

01

Lead with reassurance

Use calm, specific language that helps people feel informed before they take the next step.

02

Support the journey

Connect content and templates to real care stages: consult, appointment, plan, follow-up, and return visit.

03

Keep trust consistent

Review every asset for accuracy, warmth, compliance awareness, and the tone of a premium practice.

AI Playbook Dentists

Use these assets to make education, communication, retention, and reactivation feel clear, polished, and easier to implement.

Chapter 7: Social Content That Builds Trust and Attracts Patients 8. Chapter 8: Your 30-Day AI Implementation Plan 9. BONUS: AI Prompt Cheat Sheet for Dental Practices

03

CARE ASSET

Chapter 1: Why AI Is The Dental Practice's

Growth Engine Many dental practices lose momentum through preventable communication gaps: missed appointments, inactive patients, unscheduled treatment plans, and referrals that never get asked for. These are not only clinical workflow issues. They are patient communication issues, and AI can help the practice respond with more consistency, clarity, and care. • The No-Show Gap: missed appointments create lost chair time and schedule stress. Better reminders, preparation messages, and recovery notes help patients know what to expect and make rebooking easier.

04

CARE ASSET

Chapter 1: Why AI Is The Dental Practice's

• The Inactive Patient Opportunity: many practices have patients who have not been seen in 12+ months. AI can help draft warm recall messages that make returning feel easy and low-pressure. • The Treatment Follow-Up Gap: patients often need more time, clarity, and reassurance after a recommendation. AI-assisted follow-up can help explain next steps in plain language while keeping the tone professional and caring.

AI Playbook Dentists

Use these assets to make education, communication, retention, and reactivation feel clear, polished, and easier to implement.

01

CARE ASSET

Care System

- What AI Does vs. What You Do: AI communicates, reminds, educates, and follows up. You diagnose, treat, and build the patient relationship. Never blur those lines.

02

CARE ASSET

Chapter 2: Your First 3 AI Wins — This Week

Pick one of these and implement it this week. Each one can be set up quickly and gives the practice a more consistent communication system. • Win #1 — Appointment Reminder Sequence: A 3-message reminder sequence — 72 hours before, 24 hours before, and morning of — helps reduce appointment confusion and gives patients a clear path to confirm, prepare, or reschedule. AI drafts all three in minutes. • Win #2 — Inactive Patient Reactivation: Pull a list of patients who haven't been in for 12+ months. Use AI to write a personal, warm reactivation message. Send to 50 patients this week. Track replies, booked appointments, and patient questions so the sequence can improve over time.

03

CARE ASSET

Chapter 2: Your First 3 AI Wins — This Week

- Win #3 — Post-Treatment Plan Follow-Up: When a patient leaves without scheduling treatment, AI writes a follow-up email that recaps their diagnosis, answers common concerns, and invites them to book — without pressure. Treatment follow-up becomes easier to send without turning the conversation into a sales pitch.

04

CARE ASSET

Chapter 3: Reducing No-Shows And Last-Minute

Cancellations No-shows create schedule stress, lost chair time, and a less predictable patient experience. Patients are more likely to arrive prepared when reminders are timely, clear, and specific. The barrier usually is not wanting to fix this — it is having the time to do it consistently. AI helps remove that barrier. • The 3-Touch Reminder System: 72-hour reminder (confirm or reschedule), 24- hour reminder (logistics + anticipation), morning-of reminder (parking, what to bring, what to expect). Each one short, warm, and specific. • The Cancellation Recovery Message: When a patient cancels, most practices just update the schedule.

05

CARE ASSET

Chapter 3: Reducing No-Shows And Last-Minute

AI writes a same-day recovery message that acknowledges the cancellation, offers easy rebooking, and keeps the relationship intact.

AI Playbook Dentists

Use these assets to make education, communication, retention, and reactivation feel clear, polished, and easier to implement.

01

CARE ASSET

Care System

- The Waitlist Activation Message: When a cancellation creates a gap, AI writes an immediate outreach message to your waitlist patients — filling the slot in minutes rather than hours.
- Reducing Anxiety-Driven No-Shows: Dental anxiety is the #1 reason patients cancel at the last minute. AI writes a pre-appointment 'what to expect' email that addresses common fears before they become cancellations.

02

CARE ASSET

Chapter 4: Reactivating Your Inactive Patient List

Every dental practice has a valuable patient relationship list — hundreds of patients who were happy with their care, life got in the way, and they simply never rebooked. They're not lost. They just need to hear from you. AI makes reaching all of them feel personal.

- The Recall Sequence: A 3-message sequence — warm check-in, value-add (oral health tip relevant to their history), and a soft urgency close — can bring inactive patients back into conversation when executed consistently.
- Personalization at Scale: AI can write a different message for a patient overdue for a cleaning vs. one who left after a treatment estimate.

03

CARE ASSET

Chapter 4: Reactivating Your Inactive Patient List

The specificity makes all the difference in response rates.

- Seasonal Recall Campaigns: Back-to-school dental checks, end-of-year insurance benefits reminders, and New Year wellness campaigns can support recall conversations when timed well. AI writes all three in one session.
- The 'Use Your Benefits' Campaign: One of the most practical seasonal messages in dentistry: reminding patients in October and November that their insurance benefits expire December 31. AI writes this campaign in under 10 minutes.

04

CARE ASSET

Chapter 5: Case Acceptance — Helping Patients

Say Yes to Treatment Most dentists present a treatment plan and then wait. The patients who say no in the chair often say yes two weeks later — if someone follows up. AI makes systematic

AI Playbook Dentists

Use these assets to make education, communication, retention, and reactivation feel clear, polished, and easier to implement.

01

CARE ASSET

Follow-Up Effortless And Keeps Treatment Options Top Of Mind Without Any Pressure.

- The Treatment Plan Follow-Up Sequence: A 3-email sequence sent over 21 days after a patient leaves without scheduling: Day 3 (caring check-in + answer to most common concern), Day 10 (patient story or social proof), Day 21 (gentle last invitation).
- Addressing the Cost Objection: AI writes a financing options email that presents payment plan choices clearly and without awkwardness — one of the most common barriers to case acceptance.
- The Before & After Education Email: For cosmetic or elective procedures, AI writes a patient education email that uses before/after context, outcome framing,

02

CARE ASSET

Follow-Up Effortless And Keeps Treatment Options Top Of Mind Without Any Pressure.

and answers the top 3 questions patients ask before saying yes.

- The 'Second Opinion' Acknowledgment: When a patient says they want to think about it or get a second opinion, AI writes a gracious, confident response that positions your practice as the obvious choice without being pushy.

03

CARE ASSET

Chapter 6: Reviews, Referrals, And A Healthier

Patient Pipeline New patients often come from two places: Google and word of mouth. Both are driven by systematic communication — not by hoping patients remember to leave reviews or mention you to their friends. AI builds that system.

- The Google Review Ask: Sent 24 hours after a positive appointment, this is one of the simplest trust-building messages a dental practice can send. A stronger review base can help new patients feel more confident before they call.
- The Referral Request: Most dental patients refer when asked at the right moment — right after a great appointment or a successful treatment result.

04

CARE ASSET

Chapter 6: Reviews, Referrals, And A Healthier

AI writes a referral request that feels like a natural extension of the relationship.

- Professional Referral Outreach: GPs, orthodontists, oral surgeons, and

AI Playbook Dentists

Use these assets to make education, communication, retention, and reactivation feel clear, polished, and easier to implement.

01

CARE ASSET

Care System

pediatricians are your best professional referral sources. AI writes introduction emails and quarterly value touches that build those relationships. • The New Patient Welcome Sequence: The first impression sets the tone for the entire patient relationship. AI writes a 2-email welcome sequence — pre- appointment and post-appointment — that makes new patients feel chosen, not processed.

02

CARE ASSET

Chapter 7: Social Content That Builds Trust And

Attracts Patients Patients research dentists online before they call. Practices with consistent, reassuring

03

CARE ASSET

Social Content Get More Inquiries And Convert New Patients Faster Because Trust Is

already established before the first visit. • The 3-Post Formula: One educational post (oral health tip, procedure explainer, myth-bust), one trust post (patient story with consent, team spotlight, behind the scenes), one engagement post (question, poll, seasonal tip). Mon/Wed/Fri. • High-Converting Topic Categories: Dental anxiety and how you address it, teeth whitening facts vs. myths, the real cost of avoiding the dentist, what happens during a cleaning, Invisalign vs. braces, how diet affects teeth, children's first dental visit.

04

CARE ASSET

Social Content Get More Inquiries And Convert New Patients Faster Because Trust Is

• Batch Creating With AI: Use the monthly AI caption prompt in your 90-Day Calendar to generate all 12 captions for the month in one session. Takes 20–30 minutes. Content is done for 4 weeks. • Short-Form Video: A 30-second 'what to expect at your first visit' Reel or TikTok is the single best piece of content a dental practice can create — addresses the most common barrier to booking and works as evergreen content for months.

05

CARE ASSET

Chapter 8: Your 30-Day AI Implementation Plan

One week at a time. This plan gets you from reading to implementation without disrupting the clinical schedule.

AI Playbook Dentists

Use these assets to make education, communication, retention, and reactivation feel clear, polished, and easier to implement.

01

CARE ASSET

Care System

• Week 1 — No-Show Reduction: Write your 3-touch reminder sequence. Build your cancellation recovery message. Create your waitlist activation template. • Week 2 — Reactivation: Pull your inactive patient list (12+ months). Write your 3-message reactivation sequence. Send to your first batch of 50 patients. • Week 3 — Case Acceptance & Reviews: Write your treatment plan follow-up sequence. Set up your Google review request. Draft your post-appointment

02

CARE ASSET

Referral Ask.

• Week 4 — Social Content: Create 2 weeks of posts using your 90-Day Calendar. Batch captions with the monthly AI prompt. Schedule Mon/Wed/Fri.

03

CARE ASSET

Bonus: AI Prompt Cheat Sheet For Dental

Practices Copy and paste these into Claude or ChatGPT. Replace [brackets] with your practice details. Appointment & No-Show Prompts Write a 3-message appointment reminder sequence for a dental patient named [Name] who has an appointment on [Date] at [Time] at [Practice Name]. Message 1: 72 hours before (confirm or reschedule). Message 2: 24 hours before (logistics). Message 3: morning-of (brief, warm, anticipatory). Each under 60 words. Sign as [Practice Name] Team. Write a reactivation message for a dental patient named [Name] who last visited [Practice Name] approximately [X months] ago.

04

CARE ASSET

Bonus: AI Prompt Cheat Sheet For Dental

They came in for [last treatment/cleaning]. Make it warm and personal — not a mass marketing email. Include a soft CTA to book their next cleaning. Sign as [Dr. Name / Practice Name]. Case Acceptance & Treatment Prompts Write a follow-up email for a patient named [Name] who received a treatment plan for [treatment — e.g., crown / Invisalign / implant] at [Practice Name] on [Date] but didn't schedule. Tone: caring, not sales-y. Address the most common concern patients have about this treatment. Include a soft CTA to call or book online.

AI Playbook Dentists

Use these assets to make education, communication, retention, and reactivation feel clear, polished, and easier to implement.

01

CARE ASSET

Care System

Write an end-of-year insurance benefits reminder email for patients of [Practice Name] who have unused dental insurance benefits expiring December 31. Explain why using benefits now matters, list 2–3 common treatments that can be done before year-end, and include a CTA to book before [date]. Urgent but not pushy. Reviews, Referrals & Social Media Write a Google review request message for a dental patient named [Name] who just completed a [treatment/cleaning] at [Practice Name] and had a positive experience. Keep it under 80 words, warm and conversational. Include the direct review link placeholder [LINK].

02

CARE ASSET

Care System

Don't offer incentives for the review. Write 5 educational social media posts for a dental practice. Topics: the truth about teeth whitening, why you shouldn't ignore a cracked tooth, what causes bad breath and how to fix it, how often you actually need dental X-rays, and the link between oral health and heart disease. Each under 150 words, ends with a question or CTA. Practice: [Practice Name], [City]. Better communication doesn't just grow your practice. It helps patients get the care they need — and keeps them coming back for life.
