

Start with the system that books the *next* *client.*

This bundle is not meant to be read once and forgotten. Use it like a working salon growth desk: content for visibility, prompts for speed, rebooking scripts for retention, and numbers for smarter pricing.

01

SET UP

07

DAYS OF ACTION

30

DAYS OF TRACTION

A complete salon growth system, not a folder of random files.

01

90-day content calendar

Three monthly execution files with post ideas, hooks, captions, platform direction, and salon-specific content themes.

02

AI playbook + prompt library

Use AI to create captions, offers, emails, scripts, service messaging, policy copy, and client communication faster.

03

Client retention system

Rebooking, win-back, referral, review, and follow-up workflows for keeping the chair full between launches.

04

Brand + pricing tools

Brand positioning, visual direction, profit guide, service pricing spreadsheet, and client retention tracker.

Do this before opening every file.

01

CHOOSE YOUR GOAL

Pick one priority for the next 30 days.

More first-time bookings, better rebooking, more color clients, higher average ticket, better Instagram consistency, or stronger client retention.

02

SET YOUR INPUTS

Fill in the numbers first.

Open the profit calculator and add your services, current prices, chair time, supply costs, booth rent, and monthly income goal.

03

PICK ONE CAMPAIGN

Choose your next offer or content theme.

Examples: color refresh month, extension consults, first-time client openings, summer hair prep, holiday pre-booking, or win-back week.

04

USE THE SCRIPTS

Send one rebooking or win-back message today.

Do not wait until the whole system is perfect. One sent message can turn the bundle into revenue immediately.

Build the system once, then work from it weekly.

01

Monday

Plan seven posts from the calendar. Choose one transformation, one education post, one personal brand post, one offer, one review, one behind-the-scenes post, and one rebooking reminder.

02

Tuesday

Use the prompt library to turn those ideas into captions, story slides, and short-form video scripts.

03

Wednesday

Update the client retention tracker. Mark who is due soon, overdue, inactive, or ready for a review request.

04

Thursday

Send rebooking, review, referral, or win-back messages. Keep them warm, specific, and easy to answer.

05

Friday

Review what got saves, DMs, comments, bookings, or replies. Keep the winners. Rewrite the weak pieces. Repeat next week.

Use the right file for the right business problem.

01

I DO NOT KNOW WHAT TO POST

Open the 90-day calendar.

Use the platform, hook, and content idea as your starting point.

02

I KNOW WHAT TO SAY BUT NOT HOW TO SAY IT

Open the prompt library.

Paste the prompt into your AI tool with your service, tone, client type, and offer.

03

CLIENTS ARE NOT REBOOKING

Open the retention system.

Use the in-chair script, the post-appointment text, and the win-back sequence.

04

MY PRICES FEEL RANDOM

Open the profit calculator.

Price from chair time, supplies, overhead, skill, and profit target instead of guessing.

Make every asset sound like your chair, not a template.

01

Personalize before sending

Add the client's name, service, timing, and one detail from the appointment whenever possible.

02

Use real availability

Only create urgency when it is true. Trust is more valuable than a forced deadline.

03

Get consent

Ask permission before sharing client photos, names, testimonials, or transformation stories.

04

Stay inside your scope

Keep hair and scalp education practical. Avoid medical claims and follow your local license, salon, and platform rules.

05

Track one number weekly

Choose one metric: rebookings, consultation requests, reviews, referrals, or average ticket. A premium business is built through patterns, not panic.
