The AI Playbook for Accountants & CPAs Convert more consultations, retain clients through life events, build referral partnerships with attorneys and financial advisors, and become the most trusted advisor in your clients' lives

02

CLIENT SYSTEM

### Introduction

The CPA practices growing fastest aren't just technically superior — they communicate better. They follow up on consultations before the prospect has time to contact anyone else. They reach out proactively when a tax law changes that affects their clients. They maintain attorney and financial advisor relationships with a monthly value touch that generates referrals year-round. And they show up digitally in ways that make their ideal clients find them before they ever search a competitor. This playbook gives you 7 chapters covering every high-leverage communication scenario — with copy-paste AI prompts throughout.

### Prospect Nurturing

The Post-Consultation Follow-Up System The consultation that doesn't convert in 48 hours rarely converts at all. Most prospects are contacting 2-3 CPAs. The first professional, specific, and action-oriented follow-up wins a disproportionate number of engagements.

04

CLIENT SYSTEM

I want to: (1) summarize their situation in plain language showing I listened, (2) outline my recommended approach in 2-3 sentences, (3) present a clear next step and fee expectation. Professional but warm. Under 200 words. Sign as [Your Name], [Firm Name]. Note: review for compliance with your state bar and professional standards.

Moving Clients From Compliance to Advisory The most profitable CPA engagements are advisory — tax planning, business consulting, wealth strategy — not just compliance.
