HOW TO USE IT

TURN THE BUNDLE INTO A STUDIO OPERATING SYSTEM.

The fastest win is not making everything pretty. It is installing the moments that book projects: inquiry response, follow-up, questionnaire, package presentation, delivery message, review ask, and vendor touch.

01

Pick the market

Decide whether the asset is for weddings, corporate work, commercial brands, or hybrid studios before customizing the copy.

02

Customize the proof

Add your style, portfolio examples, production process, delivery timeline, package names, and client outcomes.

03

Ship the system

Install the inquiry reply, follow-up sequence, questionnaire, content calendar, and vendor touchpoints before redesigning anything.

QUALITY GATE

BEFORE YOU UPLOAD OR SEND ANYTHING.

Use this checklist to keep the product polished and professional.

01

No generic claims

Replace broad phrases like 'high quality video' with specific style, process, or deliverable language.

02

No fake metrics

Do not invent ROI, bookings, or campaign results. Use placeholders or actual client-approved proof.

03

Clear next step

Every sales asset should invite the client into one action: call, reply, book, review, or refer.
